

## What is WIRED?

The New Mexico WIRED regional grant brings together businesses, national laboratories, investors, economic developers, educational institutions, workforce development and advocacy organizations, and government officials. Our goal is to drive local economic transformation by promoting and integrating economic and workforce development activities. Together, we move New Mexico forward by ensuring that all New Mexicans are receiving a top-notch education, first-class workforce training and access to high-quality green manufacturing employment opportunities.

## GOALS
