

New Mexico Workforce Innovations in Regional Economic Development (WIRED) Program

New Mexico WIRED is a partnership of the New Mexico workforce development system, local businesses, economic development organizations and educational institutions. Our goal is to drive local economic transformation by promoting and integrating economic workforce development activities, and ensuring that all New Mexicans have access to educational opportunities, cutting edge workforce training, and high-quality employment opportunities.

What is WIRED?

WIRED (Workforce Innovation Regional Economic Development) is a comprehensive effort to create opportunities and incentives for communities to come together in regional strategic alliances. Our partnership includes business, educational institutions, workforce development organizations, and government working together to develop the skilled workforce of the future.

Internship Program

The NM WIRED Internship Program is looking for students in selected fields who are interested in internships in New Mexico's high tech industries:

- Green Construction
- Renewable Energy (solar, wind, biofuels)
- Microelectronics
- Optics
- Aerospace/Aviation
- Advanced Manufacturing

Benefits of Internship

- Gain real experience and make connections with industry leaders
- Learn new skills or perfect what you've learned in your classes
- Get a competitive edge when going for that next job

Eligibility

- Currently a college student
- Interest in entering one of the fields listed in this brochure
- Maintaining a 2.5 GPA

How to Apply

- Complete an internship application available at www.dws.state.nm.us/NMWIRED.html
- Provide a cover letter that explains your future career goals
- Submit your resume and school transcripts

How It Works

- We are recruiting motivated students from local community colleges and universities who are looking to enter one of the above high tech industries.
- Based on your needs, we will refer you to appropriate businesses.
- Interns gain valuable real-world experience and an opportunity to see what it takes to succeed in the high tech world.
